MODULE 1 – NATURE OF DUALITY

1) SCIENCE OF CREATION

According to quantum physics, the Universe we live in resembles a sea of motion – a quantum field of vibrant activity. All matter in the Universe is interconnected by waves of energy that spread out through time and space, so that every part of the Universe is touching every other part instantaneously in a unified field of ether. These waves oscillate through space, like ripples on a pond, as carriers of information.

Astronomers have documented the natural movement of the universal field as a spiraling whirlpool – visible in the swirling galaxies in space. Recent studies and in particular the Hubble satellite data now show that the Milky Way Galactic Core is a massive spinning vortex at approximately the velocity of light.

NASA scientists have coined the phrase “co-evolution” to describe the phenomenon of combining sparks of crystalline light in spinning vortices as Source Creation to birth new stars.

MODULE 1 – NATURE OF DUALITY

1) SCIENCE OF CREATION

All of life in the dynamic Universe emerges from a single pulse of light, from the multi-dimensional scalar standing wave pattern. Within the vacuum state of the Quantum Vortex beats the standing scalar wave of Singularity...the continual pulse of creation. It is the natural rhythm of life, like a cosmic heartbeat that fuels our Universe. There is growing astrophysical evidence that the vacuum structure found within the galactic zero point field also exists at the atomic scale level in our cells.

As ancestors before us, we are discovering knowledge of the ancient mystery of Apotheosis. By tapping into the *phi* spin of Metatron's Cube, we are able to integrate Soul energy inwards and release incongruent energy outwards. Humanity is returning to the natural counter-clockwise rhythm of the sun and stars. This extraordinary discovery was the inspiration for developing my proprietary healing process, Quantum Access™.

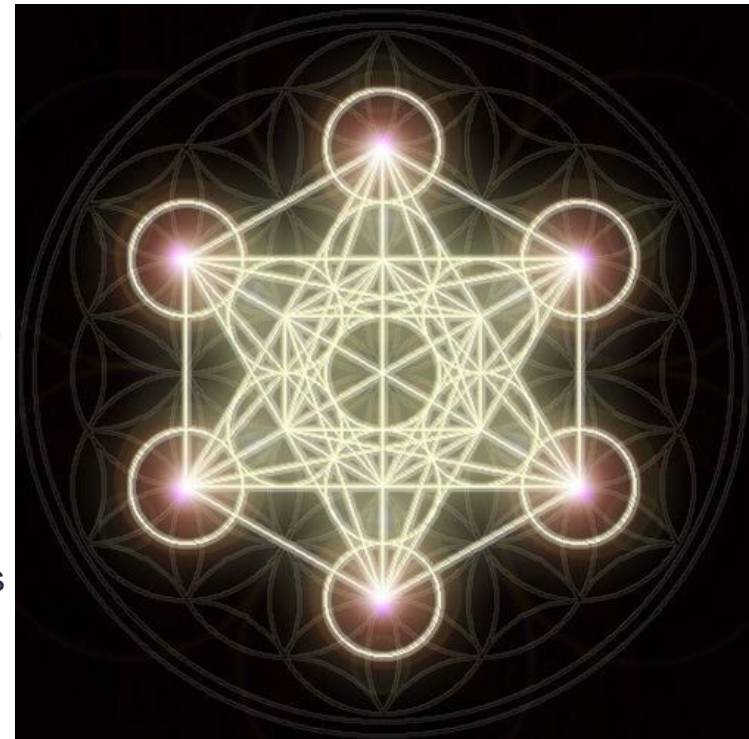

MODULE 1 – NATURE OF DUALITY

1) SCIENCE OF CREATION

The Christed Metatron's Cube is the ancient template of alchemy, the geometry of creation in our universe. Embedded within Metatron's Cube are the 5 platonic solids that correspond to the 5 elements in nature that form into the true shapes of compressed atoms that act as the internal organizational structures of molecules in natural crystals.

1) Tetrahedron (triangle) = plasma ("fire"), 2) hexahedron (square) = solid ("earth") 3) octahedron = gas ("air"), 4) icosahedron = liquid ("water"), 5) dodecahedron = ether

Also coded within Metatron's Cube is the double star tetrahedron – the geometry of the Light Body Merkaba. The 12 spiraling cones or pillars vibrate with 12D harmonics that radiate outwards, forming a spiraling vortex around the source consciousness. The 12 around 1 geometric blueprint connects us to the endless dimensional grid programs of universal holographic realities.

MODULE 1 – NATURE OF DUALITY

2) QUANTUM ENTANGLEMENT

The Quantum Theory of Entanglement demonstrates that once subatomic particles are in contact, they influence each other in the same way no matter how far they are separated. This feature of “non-locality” in quantum particles is seen in the case of identical twins who are separated at birth and yet still retain physical and behavioral similarities and telepathic connection. In this manner, there is evidence the human brain operates as a radio receiver and transmitter of quantum signals in a Unified Field of consciousness.

In physiology, there exists a state in which two or more of the body's oscillatory systems, such as respiration and heart rhythm, become synchronous and operate at the same frequency. This type of coherence is called *entrainment*. Our goal is to harmonize the heart and mind into coherent entrainment.

MODULE 1 – NATURE OF DUALITY

2) QUANTUM ENTANGLEMENT

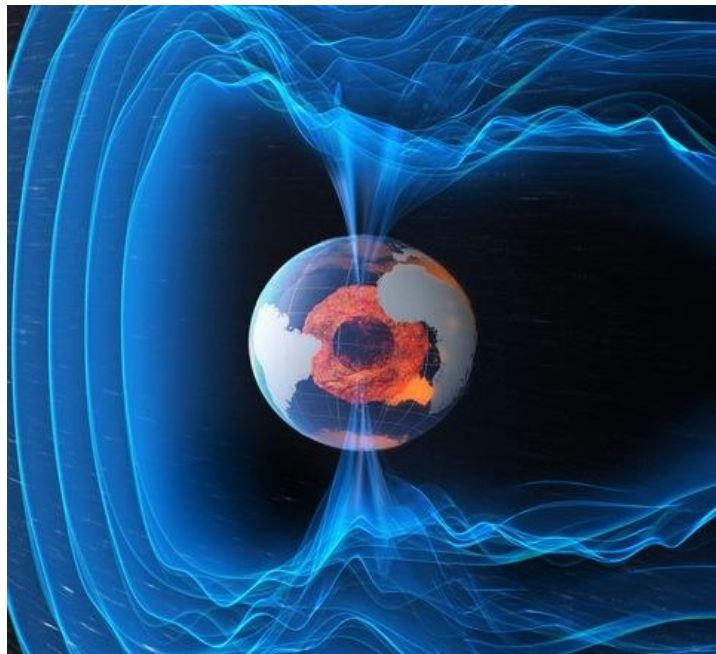

The logarithmic spirals of the Quantum Vortex, as we see in the Whirlpool Galaxy, operate like fractals, whereby they are self-similar at all scales. Although the size of the spiral increases, the shape is unchanged with each successive swirl. Yet only those components at a particular resonance frequency in the fractal-like energy spectrum can manifest in the Quantum Vortex. By activating Metatron's Cube and tuning into the harmonic frequency of *Soul Presence* within a logarithmic spiral, we can re-establish internal order, balance and stability – while metabolizing waves of photon light at the cellular level.

When meditating in the Quantum Vortex, we open the inter-dimensional doorway of the mind. According to Lynne McTaggart's research, "our thoughts are focused ordered light acting like lasers and intentioned healing creates some of the most organized waves of light found in nature."

MODULE 1 – NATURE OF DUALITY

3) POLARIZED FIELDS

Not only does humanity exist within a vast unified field of energy, but planet earth sustains a geomagnetic field of polarized forces (north/south poles). This is the Principle of Duality – in an electromagnetic field opposite forces attract! For every positive action taken, there is an equal and negative reaction.

The ever present balancing act of opposing, repelling forces of positive/negative magnetic states battle within the body, heart and mind. The geomagnetic field of duality operates in opposing dual spins. It is the clockwise (masculine) spin that causes molecular compression, creating physical particles of matter, atoms of density forming between the gravitational forces of polarization.

When spinning in an anti-clockwise (feminine) vortex in a 45 degree spiral expansion, we can unlock from the Time Matrix. Activating Metatron's Cube and the Quantum Vortex will unwind time density compression, increase energy frequency, expand the force field of light and integrate the multi-dimensional soul aspects into union.

MODULE 1 – NATURE OF DUALITY

3) POLARIZED FIELDS

Often misunderstood, the ever-present recurring resistance of negative or shadow forces is to be expected while living in 3D Duality. This is how our ecosystem retains balance and order within a polarized electro-magnetic field. It also explains why the Law of Attraction is ineffective within a dualistic environment. Opposites attract within a polarized world!

By dissolving negative polarity (bi-polar hologram) and the barriers of time density (gravity), we can access and integrate the physical body and energetic body at the same time. Working with the geometric infinity Figure-8 of light will neutralize negative polarity anywhere it is applied.

Evolving from dual spin of duality to single spin of singularity in the center of the Figure-8 creates a null-zone, a zero point standing wave of Soul Light pulse. It is within the vacuum state of infinity that all comes into coherence, a balanced, unified state of unity consciousness.

MODULE 1 – NATURE OF DUALITY

4) TIME MATRIX

Without discernment, the human mind's creative powers can be misused. This begs the question, what if an outside presence could program human minds to create a world reality of limited consciousness and robotic-like behavior? What if humanity actually existed in an artificial holographic time density matrix that was dominated and manipulated by an external controlling force? What if our mind was being programmed with fixed thought consciousness that separates us from our inherent intelligence and personal power?

MODULE 1 – NATURE OF DUALITY

4) TIME MATRIX

Since the fall of Atlantis, human souls enter the earth plane and connect with the controlling Time Matrix simulation. The subconscious mind is fed an endless stream of divisive and destructive programming that separates us from our galactic lineage and blocks Soul presence. The artificial Matrix appears like a series of frequency fences or interlocking walls of a complex maze, blocking full cognition in the mind.

The Mind Matrix streams debilitating programming into the family of origin, religions, cultural and societal dictates and mores, as well as the media – polluting the airwaves and controlling the subconscious mind. The simulation software develops a shadow Ego-identity that controls our lives, and asserts its will in opposition to Spiritual growth and change. This Ego subconscious is the source of resistance that we experience when we try to surrender to the wisdom of the Soul.
