MODULE 4 – SOUL VESSEL

1) CHAKRA CHANNEL

As Spirit (Light Current) moves and flows through the organs and surrounding areas in the physical body it beats with a certain pulse and rhythm that is called the Soul's energetic signature. The axiotonal lines are streaming light and sound through your body. As you disentangle from living in the Matrix simulation you begin to connect, open and expand with Soul Presence in the chakra pillar and activate your Light Body. When you clear density, inertia, emotional trauma and toxic sludge from each chakra, you open and ascend up the channel to your Higher Self, the Gatekeeper and Guardian of your channel. With the gradual opening and clearing in your chakra channel, you are creating a sacred environment to embody the divine self.

MODULE 4 – SOUL VESSEL 1) CHAKRA CHANNEL

The chakra channel is the home of Soul Presence. There are 7 chakras in the physical body and 5 transpersonal chakras in the astral body above the crown. Each of the 12 chakra centers connect to one of the 12 dimensions of the universe.

As you heal and clean your chakras, you become a clear, open channel to the Higher Self and the quantum field of all existence (past, present and future). You are activating your direct link up to spirit. An open chakra channel operates like a human radio antenna tower – a magnetic receiver of abundant energy. You begin to magnetize what matches your Soul essence in life.

Shimmering Gold		12th Chakra ~ Connection with the Cosmos, Connection to the Monadic level of divinity
Pink Orange		11th Chakra ~ Advance spiritual skills, teleportation, bi-location, telekinesis
Pearl White		10th Chakra ~ Divine creativity
Blue Green		9th Chakra ~ Soul blueprint, the individual's total skills and abilities learned in all life times
Seafoam Green		8th Chakra ~ Activates spiritual skills, energy centre of Divine love
Ultra Violet		Crown Chakra ~ Sahasrara Chakra
Indigo		Third Eye Chakra ~ Ajna Chakra
Blue		Throat Chakra ~ Vishuddha Chakra
Green		Heart Chakra ~ Anahata Chakra
Yellow		Solar Plexus ~ Manipura Chakra
Orange		Polarity Chakra ~ Sacral, Swadhisthana
Red		Base or root Chakra ~ Muladhara Chakra

MODULE 4 – SOUL VESSEL

1) CHAKRA CHANNEL

The Heart Center acts as the bridge between the 3D physical body and the Soul's 5D/6D energy body. Past wounding that is stored in the Heart Center requires healing to open the heart bridge to Soul Presence and the 5th dimensional earth plane.

When we increase our energy frequency by spinning our atoms faster in counter-clockwise motion, we spin out lower vibrational toxins stuck in the chakras and open our channel to higher dimensional access. We are shifting from being dominated by the 3D thinking mind to sensing and feeling the flow of energy in the heart's 5D feeling field.

Quantum coherence at the subatomic level, enhances the interactive communication between energy waves. DNA operates as a biologic quantum field computer which connects us to the energies of the spiritual dimension and consciousness. We are evolving into a 'Feeling Field' as opposed to being controlled by the Ego mind.

MODULE 4 – SOUL VESSEL

2) SOUL DNA

All of existence originates as energy waves looping in coherence, storing quantum 'packets' of electrical charge that materialize as physical matter (atoms). The electrification of matter produces creative renewal, self-generating continual vitality, health and well-being. We use the counter-clockwise reverse spin to unwind the molecular compression of physical particles in order to expand and radiate Light.

The unique Soul Template is comprised of embedded coded circuitry, like an architectural framework or infrastructure. The Soul Template is designed and encoded from our original star lineage and integrated into the energy body and neurological network to provide a sacred home for the Soul Presence. We were seeded here from various star nations. This explains the vast genetic and ethnic diversity in humanity on the planet at this particular time.

The Soul Blueprint operates similarly to an architecture blueprint, like a user's manual of important codes, instructions, and detailed plans. It is imprinted in our energy signature, our fingerprints, in the tone of our voice, the map on our hands, the patterns of speech, our astrological natal chart, and all other aspects of human distinction. From the moment of birth...the genetic bloodline of our Soul DNA has been coded into the etheric template and recorded for eternity.

As we evolve beyond the limits of human genetic reengineering and any entanglement with the birth family, the divine Soul lineage/bloodline gradually encodes the conscious mind, the Heart Center and DNA. It forms a new energetic framework for Soul embodiment.

MODULE 4 – SOUL VESSEL

2) SOUL DNA

Our perception of life originates in the brain's selection of a certain band of frequency patterns. We operate as radio "receivers" in a kaleidoscopic sea of frequency (3D, 4D, 5D, etc), and what we extract from the quantum field converts into physical reality.

Based on Quantum Mechanics and Einstein's Unified Field Theory - throughout time every thought, emotion, fear and belief is stored in our cellular structure...evolving into the blueprint that produces our 3D reality. The swirling strands of DNA code are the conveyors of genetic information that determine our entire physical existence; and can be changed! By correcting the intention of our thoughts, choices and desires we can transform the molecular patterning that creates our human experience.

The 'circulatory action' of the spiraling holographic universe is a cause-and-effect that forms a circuit or loop, and life events are said to "feed back" into itself. We begin to recognize the impact of our thoughts, intentions and emotions, as we receive feedback 'reactions'. If humans are electromagnetic fields vibrating to a certain frequency of output, our mental and emotional state is directly affecting the manifestation of our environment.

MODULE 4 – SOUL VESSEL

2) SOUL DNA

The hyper-accelerated Quantum Vortex emits electromagnetic levels up to gamma frequency – brainwaves greater than 25 hertz. Gamma photons have neither mass or electric charge and can penetrate through matter. When utilizing the properties of vortex phenomenon, the highest frequencies of photon light will rid decaying cells of toxins. This will activate the internal cellular transformation of subatomic matter.

By streaming photon packets of crystalline light into the nucleus of the cells, we affect the very nature of how cells manifest into matter with the frequency of intent. This is accomplished through *Departicularization* – a process of dissolving from a particle field of matter into a virtual-particle field of Light. As we surrender into the collapsing pulse of Singularity in Zero Point, we dissolve distorted manifestations of disorder (shadow consciousness). In the expanding pulse of electromagnetic energy we recode with Soul DNA, the divine blueprint of eternal Soul lineage.

MODULE 4 – SOUL VESSEL

3) LIGHT BODY

Tapping into the ancient knowledge of the Mystery Schools, we are utilizing sacred geometry to activate the complex, multi-dimensional Merkaba Light Body. Activating the sacred template of Metatron's Cube with the Infinity Figure-8 dynamic opens the multi-dimensional grid flow access of the star tetrahedron Merkaba, centered at the thymus/Heart Chakra.

The Merkaba Light Body acts as a rotating multi-dimensional geometric vehicle of Light and Consciousness, while remaining grounded and anchored in the heart center. The energetic Torus "Grid" system forms the templates for specific dimensional access. When the grids are in place, consciousness can "Flow" throughout the dimensions as Light current, often experienced as energy movement, tingles and sensory feelings. Energy streams in a vertical spiral, an upwards/downwards flow through the 12 dimensions of the Chakras and the Torus swirl with the Star Tetrahedron Merkaba Torus magnetic field.

MODULE 4 – SOUL VESSEL

3) LIGHT BODY

The Merkaba is the spiritual vehicle that transports our consciousness from one dimension to another. The Merkaba helps us fully activate and expand our Crystalline Light Body through the 12 chakras and dimensions. The Merkaba is surrounded by swirling rotating fields of Light activated by Metatron's Cube. When activating Metatron's Cube the Quantum Vortex spirals open and the Merkaba spins in counter-clockwise expansion aligned with the rhythm of the multiverse.

The activated Merkaba Body of Light swirls divine essence out into the universe and back into the Heart Center. The Merkaba field formation creates a vacuum state in the Heart Chakra at 'zero point' to fill with Soul Presence. Within the swirling torus field rotation the magnetics overflow with Soul vibration, enhancing more Soul magnetism.

MODULE 4 – SOUL VESSEL

4) ASCENSION CODES

The Merkaba is the crystalline Light Body (star tetrahedron geometry) activated at the Heart Center with Metatron's Cube, and fuels the Torus with higher dimensional Light. Photon light consciousness transfers all codes, symbols, and intelligence of the Soul Blueprint from the quantum field down the chakra channel to code into the pineal crystal (Master Receptor Cell). As we gradually ascend into higher energetic frequency and dimensional access, the Soul light activates the ascension codes that support the transfiguration of the cellular structure.

During meditation, visualize the flow of light Intelligence streaming down from the Higher Self to encode into the pineal crystal, hypothalamus, thymus/Heart Center and cell DNA with your divine Soul blueprint and ascension codes.
